Buying Pavers & Blocks

We are hardscape experts with decades of practical knowledge. Let us help make your next hardscaping project a simple and stress-free process!

- ① Pick your Product**

At Sharecost, you have access to over 1,000 different paving products to choose from.

 - ✓ **Stocked Products** can be ordered in any quantity, from a single stone upwards.
 - ✓ **Special Order Products** are sold in full-pallet quantities only. If you have extra special-order pieces at the end of your job we can dispose of them in our concrete recycle bin for you at no charge with proof of purchase (you just have to get the extra pieces here!).
- ② Work with Our Sales Team**

We'll help determine the best products and solutions for your project. We will also help you calculate the exact quantities needed.
- ③ Determine Who's Installing**

Advise us if you want to DIY or let us know you'd prefer to have an installer build your hardscape for you.

 - ✓ Our knowledgeable staff have practical, hands-on knowledge installing pavers and blocks... we can help you with the details to make your first project a success.
 - ✓ We have great working relationships with many professional installers on the Island. We can match the right installer to your project and have them contact you to quote and do the work for you.
- ④ Order & Pay for Your Product**

We only order product from the manufacturing plant when your invoice is paid in full. Orders cannot be cancelled or sent back once product is being shipped to the Island (due to high shipping costs and re-stock fees).
- ⑤ Prepare for Your Installation**

Pavers/blocks typically take 7 to 12 business days to land in Nanaimo. During this time, it is best to start preparing for your install, if you haven't already.

 - ✓ We offer an entire assortment of rental tools, including plate compactors, laser levels, power wheelbarrows, and even excavators to help with the heavy lifting. Now's a good time to put in your reservations.
 - ✓ Do your excavation, haul-out your dirt, and have us deliver road base and any other supplies needed for your project **BEFORE** the palletized goods arrive; you'll need the space to keep an efficient working jobsite. Also note that water features, irrigation piping, and landscape lighting are usually installed before your hardscape. Artificial turf is also an easy job to do at the same time as the preparation work is very similar to that of paver and block installs.
- ⑥ Pick Up Your Product –or– Have Us Deliver**

As pallets typically weigh from 2,800 to 3,500 pounds, most customers choose to have the materials delivered.

 - ✓ We deliver with a heavy-haul flat-deck truck and all-terrain forklift to get the heavy goods as close to the install site as possible to minimize the physical labour involved. Please ensure when we arrive that there is ample room to place the pallets where you want them!
- ⑦ Questions? We're Here to Help!**

Our job isn't done once your pallets leave our yard. If you have any questions during your DIY installation, or if you've got questions while an installer is working on your site, we are here for you. Please don't hesitate to call!

Stocked Product Listing

Stocked products can be ordered in any exact quantities required for a project. Special order products (not listed below) are available for sale in full pallet quantities only.

* no pallet discount available

Hardscape projects usually involve moving many tonnes of materials.

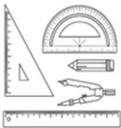

Fortunately, Sharecost has the equipment, trucks, bulk gravels, and accessories to help make quick work of the heavy lifting.

Concrete Slabs

Concrete slabs are available in various sizes. There uses include sidewalks, patios - and even balconies, terraces, and roof tops when used with a pedestrian system.

Concrete Slabs	Finish or Features	Supplier	# of Sizes Available	Thickness	Sq. Ft. per Pallet	Cost per Sq. Ft. List Price

* Palletized Materials – Fine Print & Delivery Details

- We have stocked items on the ground available for purchase in any quantity required.
- Non-stocked items are special order and available in full pallet quantities only.
- 10% discount on all 2+ pallet orders for all block or pavers ordered for a project - some restrictions apply.
- For larger projects of 8+ pallets please inquire for a quote.
- Pricing noted in this package is for grey coloured product. Colour blended units are available for many of these products.
- Some products have a minimal upcharge for colour blends, others do not have upcharge.
- Please ensure there is enough room on your site to get our delivery truck and forklift in/out to leave your pallets.
- Note that full pallets typically weigh between 2800 to 3500 pounds each.
- Remember to return empty wood pallets in usable condition for a refund in store if applicable (bring your original invoice).
- Taxes are not included. Pricing and specifications are subject to change without notice.
- Please inquire at our sales desk for exact pricing and shipping details specific to your project.

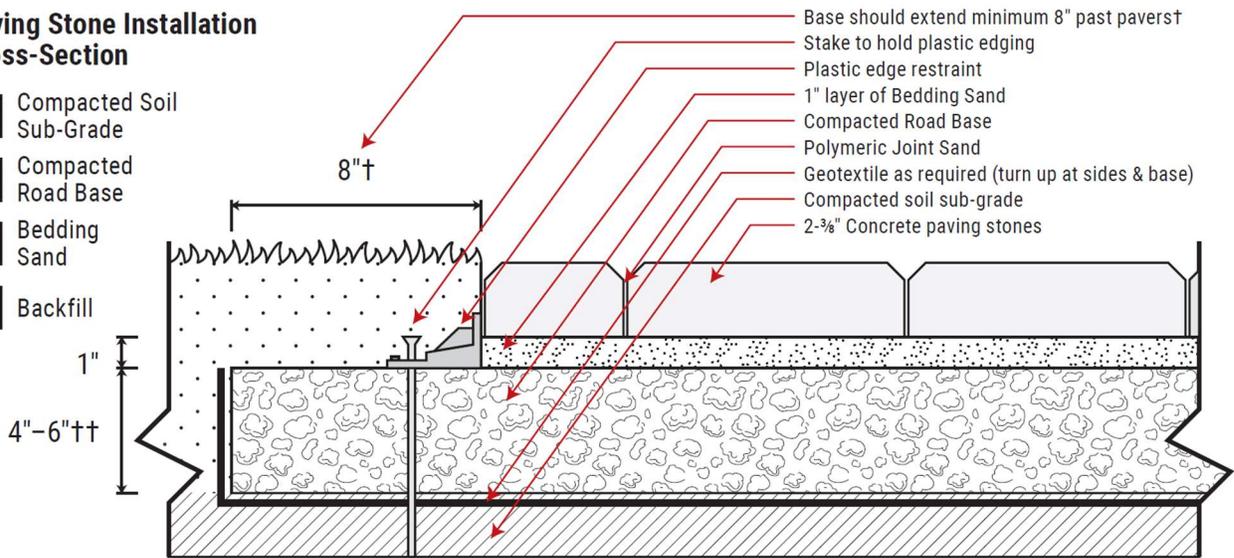

Installing Your Hardscape

Did you know? Drainage and use of the proper type, quantity, and **COMPACTION** of bulk aggregate rock are the **MOST** important details to a long-lasting install.

- ✓ Using 3/4" drain rock, compacted 3/4" road base, and 3/4" fractured rock gives a structural, well-drained install that will last decades or longer.
- ✗ Installs built on non-load bearing dirt will quickly settle and be pushed apart by gravity and winter freeze-thaw cycles. Do **NOT** cut corners here: the removal of dirt, and installation/compaction of proper aggregate preparation is far **LESS** expensive than repairing and doing a job twice.
- ✓ Yes, we have the bulk materials you need as well as the rentals tools to help with the heavy lifting and compaction.

Paving Stone Installation Cross-Section

-  Compacted Soil Sub-Grade
-  Compacted Road Base
-  Bedding Sand
-  Backfill

† Extend base by 12" past pavers for driveway installations †† Base thickness should be 8"-14" for driveway installations (depending on underlying soil conditions)

Retaining Wall Block Installation Cross-Section

-  Compacted Road Base
-  3/4" Fractured Rock
-  Drain Rock
-  Backfill
